Dear Commissioner Henney,

I am a member of the Center for Science in the Public Interest and I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That is why I support the petition filed by the CSPI.

Also, meat and poultry growers should be working on creating cleaner environments in which to raise animals, not try to circumvent the disease the dirty and close conditions promote by using drugs.

Thanks for listening to my concerns.
